Profiles of For-Profit Education Management Organizations 2004-2005

Introduction

In 2004-2005 the education management industry continued its decade-long expansion. More students were enrolled in schools managed by Education Management Organizations (EMOs) in 2004-2005 than at any time since the Commercialism in Education Research Unit (CERU) and the Education Policy Research Unit (EPRU) began tracking the industry in 1998-1999.¹ The term EMO, originally coined by Wall Street analysts to describe the for-profit companies involved in the management and administration of public schools, is intended to reflect similarities between such companies and Health Maintenance Organizations (HMOs).² For the purposes of this report, a company is considered an EMO if it is for-profit, manages a school that receives public funds, and operates under the same admissions rules as regular public schools.

This year's *Profiles of For-Profit Education Management Organizations* is the largest to date, listing 59 companies that manage 535 schools, enrolling approximately 239,766 students in 24 states and the District of Columbia. In the past year, eight firms have been added to the *Profiles*, raising the total from 51 in 2003-2004 to 59 in 2004-2005. The 2004-2005 *Profiles* report is the seventh-annual report on for-profit education management companies. Table 1 indicates the growth in the number of such companies profiled from 1998-1999 through 2004-2005.

Table 1: Number of Companies, Schools, and States Profiled by Year

School Year	Number of Companies Profiled	Number of Schools Managed by Profiled Companies	Number of Students Enrolled by Profiled Companies	Number of States in Which Profiled Companies Operate
1998-99	13	135	N/A	15
1999-2000	20	230	N/A	21
2000-01	21	285	N/A	22
2001-02	36	368	142,709	25*
2002-03	54	406	189,199	26*
2003-04	51	463	200,403	29*
2004-05	59	535	239,766	25*

*This number includes the District of Columbia.

EMOs manage district schools under a contract with local school districts and charter schools. It is charter school legislation, however, more than any other factor, that is fueling the growth of the for-profit education industry. Although charter schools are public schools operated with public funds, they are generally established by organizations independent of a school district and are given greater freedom in their day-to-day operations in return for achieving certain specified outcomes. Charter holders may include groups of parents, teachers, or both; academic institutions; and non-profit or other organizations. It is common for charter holders to

hire EMOs to manage charter schools on their behalf. Less often, EMOs may hold charters directly.³ Charter schools account for a large and growing majority of EMO contracts. Of the EMO-managed schools covered in the *Profiles of For-Profit Education Management Companies 2004-2005*, 86 percent are charter schools, up from 81 percent in 2003-2004 and 74 percent in 2002-2003. In contrast, only three profiled companies manage district schools and the number of district schools under management has remained relatively stable (between 68 to 97 schools since 2000-2001). In 2004-2005, the number of district schools under management is 77.

EMOs are expanding not only by enrolling more students, they are also venturing into new education-related areas such as tutoring. In 2004-2005, Edison Schools, for example, reports that it has contracts to *serve* 250,000 students. This number includes students enrolled in schools that use Edison programs and products as well as students enrolled in Edison-managed charter and district public schools.⁴ Of the quarter million students Edison reports serving in 2004-2005, 66,482 are actually enrolled in the 98 schools Edison manages,⁵ a decrease of 3,959 from the approximately 70,441 students enrolled in the 2003-2004 school year. It should be noted that although Edison managed 109 schools in 2003-2004, enrollment data was available for only 98.⁶ For 2004-2005, Edison manages a total of 98 schools and complete enrollment data are available.

The for-profit education management industry, as a whole, continues to consolidate. Eighty-one percent of all EMO managed schools are now run by firms with 10 or more schools under management (large EMOs).

Factors Shaping the Industry

The 2002 reauthorization of the Elementary and Secondary Education Act, popularly known as “No Child Left Behind,” includes a number of provisions that encourage the growth of for-profit education enterprises. Schools labeled as failing are eligible for federal support to purchase tutoring services, curriculum materials, or hire consultants. These services are potentially very lucrative. *The New York Times* reports, for example, that “the federally financed tutoring industry has doubled in size each of the last two years” and it is projected to become a \$2 billion-a-year enterprise.⁷ Schools that fail to meet their achievement goals for four consecutive years may be reorganized under new management or as independent charter schools. Thus, with hundreds of millions of dollars available to manage charter schools and lucrative government contracts to provide support services, it is no surprise that more EMOs open each year.

So-called “virtual schools” represent another source of growth in the EMO industry. Virtual schools, sometimes known as “online charter” or “virtual charter” schools, offer an Internet-based curriculum outside of the conventional brick-and-mortar setting of traditional public and charter schools, and they frequently cater to children who were previously home-schooled. Where legislation has enabled such schools, state education dollars pay for children who enroll in them. Roughly 2,400 such schools currently serve 40,000 to 50,000 students.⁸ Virtual schools appear poised to generate substantially larger profits than conventional for-profit charter schools because they receive the same amount of per-student funding as their traditional public school counterparts despite not having

to support a physical structure.⁹ The tax dollars spent to provide services to home-schoolers represent a potentially significant liability for the states in which virtual schools are permitted to operate.

Proponents argue that EMOs provide competition and therefore improve services by harnessing the profit-seeking motive of the marketplace.¹⁰ Competition in the pursuit of profits, they maintain, forces companies to reduce administrative inefficiencies, hire more effective teachers, and as a result, produce gains in student achievement.¹¹ Critics, however, contend that EMOs offer little or nothing that is not already available to public schools and that the incentive to turn a profit may lead EMOs to act in ways that are not in the best interests of students or the community.¹² Moreover, they point out that the record shows that charter schools (most EMO-run schools are charters) have rarely been held accountable for achieving promised academic results.¹³ Additionally, there appears to be a recurring pattern of questionable relationships between politicians, policy makers and for-profit companies.

Profitability

Although profits are central to the justification for EMOs, the profitability of almost all of the firms in the industry remains unknown. Fifty-seven of the 59 EMOs profiled and all 16 of the largest EMOs are privately held and, therefore, are not required to provide to the public detailed financial information. Thus, policy makers and others have no way of independently establishing whether such companies are profitable or have the resources to support their proposed activities. Other basic information, such as how

much of an EMO's revenue is spent on education compared with other costs such as marketing and advertising, executive salaries, or returns to shareholders, is similarly unknown.

The lack of available information raises important questions. For example, K12 Inc. manages California Virtual Academies (CVA), "a network of virtual public charter schools, founded in the summer of 2002."¹⁴ Its website describes CVA as "a program of K12 Virtual Academy." The state of California pays CVA \$4,700 for each student enrolled. Of that, \$600 per child is paid to K12 as a management fee, and another \$1,800 per child is paid to K12 for curriculum.¹⁵ That leaves \$2,300 per student that apparently stays with CVA. It is not clear where that money goes or how it is used. On the other side of the country in Springfield, MA, Sabis Educational Systems, the for-profit company managing Sabis International Charter School in Springfield, is being criticized for collecting the \$2.86 million surplus maintained by the school over the past three years. During the same period, the school district laid off 329 teachers.¹⁶

Accountability

Advocates of private management of district and charter schools have argued that the power to cancel contracts for non-performance allows districts to hold private management firms accountable. Certainly, districts have sometimes exercised that power. Complaints about the performance of EMO-managed schools have led to decisions not to renew contracts with EMOs,¹⁷ and on

occasion to cancel contracts in mid-term.¹⁸ Such decisions are relatively rare, however, and most often take place after the fact. Moreover, while an EMO might stand to lose *future* profits when it loses a contract for failure to perform, the action does not deprive it of profits it gained while failing to perform.

A school's profitability is no predictor of its academic success. The Lincoln Center Charter School in York, PA, managed by Edison Schools, receives more than \$4 million a year from the district to teach 690 students. The school, however, fell nine percent below the York School District's worst performing school in the Pennsylvania System of School Assessment (PSSA) test, and yet managed to make \$813,000 in profit in 2002-2003. That money went to Edison for managing the school, and under the current agreement, Edison is not required to share the profit generated with the school.¹⁹

Many of the schools managed by Edison continue to fall short in NCLB's measures of academic achievement. In the Chester Upland School District, where nine schools have been run by Edison since 2001, PSSA scores are falling. Although Edison manages the district's top performing school—Showalter Middle School—the percentage of students scoring below “basic” on the PSSA reading exam rose from 3.2 percent in 2002-2003 to 16 percent in 2003-2004. At Edison-managed Chester High School, 85 percent of 11th graders scored below basic in math, and 68 percent scored below basic in reading.²⁰ Not surprisingly, by November of 2004, school board sentiment had shifted decidedly against Edison, with a majority of school board members calling for the company's removal.²¹

A record of failure does not necessarily mean an end to contract opportunities. Despite Edison's record of failure in Florida, state officials could give the company a second chance. Miami-Dade and Broward Counties have several schools that are vulnerable to takeover in the 2005-2006 school year. Even after Edison's contract to run Henry E.S. Reeves Elementary was terminated by the Miami-Dade School Board in February 2005 – because after eight years of running the school the company had not outperformed traditional public schools²² – the board considers Edison one of four viable candidates to manage the county's latest group of “failing” schools. The *Miami Herald* reported that the controversy stretches beyond the School Board's decision to reconsider Edison. The state of Florida public-employees pension fund has purchased most of Edison's stock, “giving it a big stake in the company's success,” prompting one public official to ask, “If they do poorly, are we going to fire them at the jeopardy of our stock?”²³

While, in general, the number of EMOs is on the rise, relationships between particular EMOs and schools change relatively often. In 2004-2005, previously reported contracts between EMOs and at least 22 schools ended. Whether the EMOs or the schools initiated the separation is unknown. Moreover, the status of these schools is uncertain. Some schools may have been closed, while others may remain open but no longer under contract with the EMO in question or any EMO at all. Often, news reports are the best source of information about the reasons for cancelled contracts and the impact of these decisions. For example, *The Philadelphia Inquirer* reports that Renaissance Advantage Charter School in West Philadelphia, originally managed by Mosaica, lost its charter after the school failed to meet its academic or attendance goals, to file annual reports in a timely fashion, to provide documentation showing 75 percent of its teachers were certified, and to maintain stable staffing.²⁴

Questionable Relationships

California Charter Academy (CCA), California's largest chain of publicly financed charter schools, closed 60 schools while facing bankruptcy in the fall of 2004.²⁵ The closures left 10,000 students without a school to attend and without provisions for students to secure their immunization and academic records.²⁶ The CCA organization was managed by the for-profit Educational Administrative Services Corp.; both organizations were the subject of an Associated Press investigation. The news service's report "detailed the school's questionable enrollment records, its practice of having small school districts oversee dozens of remote campuses, and its use of the private management firm to avoid disclosing school executives' salaries and other expenses."²⁷ C. Steven Cox was the chief executive officer of both CCA and Educational Administrative Services Corp, and his dual role is currently under investigation by state officials.²⁸

Under No Child Left Behind, when a school is labeled as "failing" for four consecutive years, it is subject to one of the following measures: replacement of all or most staff including the principal, state takeover of the school, hiring an outside entity to manage the school, or becoming a charter school.²⁹ Thus, "failing" schools are a large potential market for EMOs. In this context, the fact that political figures have been among the investors in EMOs creates the appearance of self-dealing and influence peddling, i.e., graft and corruption.

The relationship between former Secretary of Education William J. Bennett and K12, Inc. is illustrative. In Arkansas, The Virtual School, an online academy, is part of a pilot program launched by the Arkansas Department of Education in conjunction with K12 Inc., a private company headed by Bennett. The school not only received federal grant money in the amount of \$9.3 million for five years, but was recently exempted from a state law that ordinarily forbids public school officials from having a financial interest in the sale of textbooks or other instructional materials in the schools with which they have an official connection. The state Board of Education waived this rule for the virtual academy, making it the only Arkansas school with this type of exemption.³⁰ Sitting on the school's board of directors are former state senators John Brown, John Riggs, and Kevin Smith.³¹

Similarly close relationships between schools and contractors are found elsewhere. For example, Janet Aikele, who was head of the Idaho Virtual Academy, recently left her position to take a job with K12 Inc., the company that provides the school's curriculum.³²

The links between Planagement and Eagle Academies of Texas demonstrate the often close relationships that exist between the non-profit schools and the for-profit companies that manage them. Eagle Academies is a non-profit charter school chain that shares an office with the for-profit management firm Planagement. An article in the *Austin American Statesman* revealed that the two companies are often hard to distinguish – the companies not only share an office, but a receptionist, conference room, and company vehicles – yet Eagle maintained that it employs Planagement to manage its finances so that school officials are able to concentrate on education.³³ The newspaper reports that Planagement is “managing more than the finances,” including recommending candidates for

Eagle's board. Students also learn a curriculum designed by one of Planagement's executives, who is a former Eagle administrator.³⁴ The same article found that Eagle spends nearly twice the state average on administration while spending half as much on instruction. This kind of financial management is in direct contrast to the claims of EMO supporters who argue EMOs can save money on administration that can be directed to classroom instruction.

Eagle is also affiliated with Pathway Publishers, a for-profit company that provides the software for all of Eagle's physical charters. As Eagle enters the virtual school business, doing away with the overhead involved in traditional brick and mortar, their profit margin increases.³⁵ Three states, Hawaii, Mississippi, and Tennessee, have now implemented laws banning schools from setting up contracts with for-profit companies.³⁶ It remains to be seen, however, whether or not these laws will be effective in stopping for-profits from utilizing non-profit organizations as channels for receiving public funds.

Enrollment Comparisons

For the first time, the 2004-2005 *Profiles* report compares the enrollment of managed charter and district school to the size of the U.S. average charter and district school enrollment for schools serving the same grade levels. Schools located in rural areas and small towns were excluded from the calculations as most charter schools do not operate in these areas and their inclusion would have skewed the average size of district school enrollment downwards. RPP International reported in 2000 that the median size of charter

schools was substantially smaller than district schools (137 students vs. 475 students).³⁷ The RPP comparison suggests that students attending charter schools are more likely than students attending district-run schools to be in a small school setting and thus receive the educational benefits associated with small school size. Since charter schools receive from the state the same per-student funding as district schools, fewer students equals less money. This sets up a conflict between the potential profits to be made by enrolling large numbers of students and the educational desirability of small schools.

To describe the relationship between the for-profit education industry and charter and district schools, several comparisons to national data have been drawn. The methods used to derive the data and develop the comparisons are described in Appendix C. Virtual schools are excluded from this analysis because enrollment comparisons between virtual and bricks and mortar schools are not meaningful and because their inclusion would have skewed the average size of charter schools upwards.

It is clear that the for-profit education industry is overwhelmingly focused on running charter primary schools (Table 2). The 59 firms tracked in this report manage 21.7 percent of all (2,010) charter schools and 26.7 percent of all (965) charter primary schools (Table 2). Of the 505 schools run by these firms, 436 (86.3 percent) are charter schools, and of those charter schools, 257 (58.9 percent) are primary schools. It is also clear that the for-profit education industry is now dominated by firms with 10 or more schools under management (large EMOs).

Table 2: U.S. Charter Schools by School Level

	Primary	Middle	High	Other*	All School Levels
Number of Charter Schools	965	177	558	310	2,010
Number of Charter Schools Managed by EMOs	257	12	96	71	436
Percentage of Charter Schools Managed by EMOs	26.7%	6.8%	17.2%	22.9%	21.7%
Number of Charter Schools Managed by Large EMOs	214	8	67	47	336
Percentage of Charter Schools Managed by Large EMOs	22.2%	4.5%	12.0%	15.2%	16.7%

Note: Non-charter schools are not included in these data. Virtual charter and non-charter schools are not included in these data. Two charter schools, Valor Campus of Detroit (National Heritage Academies) and Charlotte Forten Academy (Leona Group), did not report grade levels and were not counted in these data.

*The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix C.

The 59 EMO’s profiled account for 31.0 percent (175,350) of all students (565,648) enrolled in charter schools and fully 41.3 percent (114,591) of all charter primary school students (277,240) (Table 3). Moreover, 36.9 percent (102,165) of all students enrolled in charter primary schools attend schools run by the 14 large (non-virtual) EMOs (Table 3).

Table 3: U.S. Charter School Enrollment by School Level

	Primary	Middle	High	Other**	All School Levels
Number of Students Enrolled in All Charter Schools	277,240	43,768	119,999	124,641	565,648
Number of Students Enrolled in Charter Schools Managed by EMOs	114,591*	3,215	30,309	27,235	175,350*
Percentage of Students Enrolled Charter Schools Managed by EMOs	41.3%*	7.3%	25.3%	21.9%	31.0%*
Number of Students Enrolled in Charter Schools Managed by Large EMOs	102,165*	2,111	25,047	18,708	148,031*
Percentage of Students Enrolled in Charter Schools Managed by Large EMOs	36.9%*	4.8%	20.9%	15.0%	26.2%*

Note: Non-charter schools are not included in these data. Virtual charter and non-charter schools are not included in these data.

* One school, Valor Campus of Detroit School of Industrial Arts (a charter primary school managed by National Heritage Academies), has unknown enrollment. Its enrollment is not counted in these data.

**The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix C.

Of all the charter schools managed by large EMOs, 65.5 percent have enrollments above the average U.S. charter school enrollment. The majority of students attending charter schools run by 12 of the 14 large EMOs are in schools larger than the national average for comparable charter schools (Table 4). Students attending charter primary schools managed by 10 of the 14 large EMOs are likely to be enrolled in schools that are larger than the average U.S. charter primary school (Table 5).

Table 4: Percentage of Large EMO Charter School Students Who Attend Schools with Enrollments Above the Average U.S. Charter School Enrollment

Large EMOs	Percentage
Victory Schools	100

Note: Non-charter schools are not included in these data. Virtual charter and non-charter schools are not included in these data.

* One school, Valor Campus of Detroit School of Industrial Arts (a charter primary school managed by National Heritage Academies), has unknown enrollment. Its enrollment is missing from these data.

Overall, 20.5 percent of large EMO-run charter schools have enrollments above the average U.S. district school enrollment.

The majority of students attending charter schools managed by Charter Schools USA, Edison Schools, and Imagine Schools are very

likely to be attending schools that are larger than the national average for district schools (Table 6). Students attending charter primary schools run by the same three EMOs are also likely to attend schools that are larger than comparable district schools (Table 7).

Table 6: Percentage of Large EMO Charter School Students Who Attend Schools with Enrollments Above the Average U.S. District School Enrollment

Large EMOs	Percentage
Edison Schools	74
Imagine Schools	63
Charter Schools USA	63
Helicon Associates	46

Victory Schools	0

Note: Virtual charter and non-charter schools are not included in these data.

* One school, Valor Campus of Detroit School of Industrial Arts (a charter primary school managed by National Heritage Academies), has unknown enrollment. Its enrollment is missing from these data.

Two of the three large EMOs that manage district schools appear to be following the same pattern. The majority of students attending district schools managed by Edison and Victory Schools are likely to attend schools with higher enrollment than the average

U.S. district school enrollment (Table 8). Almost three-quarters of Edison’s charter primary schools students are likely to attend schools with enrollments above the average district school enrollment (Table 9).

Table 8: Percentage of Large EMO District School Students Who Attend District Schools with Enrollments Above the Average U.S. District School Enrollment

Large EMOs	Percentage

Large EMOs	Percentage
Edison Schools	71
Victory Schools	46

Note: Virtual charter and non-charter schools are not included in these data. The companies displayed here are the only companies profiled that manage district primary schools.

Large EMO Business Model

The for-profit industry appears to be consolidating. It is now dominated by firms that run 10 or more schools. The business model pursued by these firms appears to be to focus on charter primary schools (Tables 2 and 3) and to enroll relatively large numbers of students (Table 6, 7, and 8). Since state funding formulas rarely distinguish between primary and secondary education, focusing on less-expensive-to-run primary schools provides the firms with a built in cost advantage over school districts that must support both primary and more expensive secondary programs. This advantage is amplified by creating academic environments with large enrollments.

Immediate profit is not likely to be the only reason for focusing on primary schools. As Nichols, Glass, and Berliner have pointed out, primary achievement outcomes are most readily influenced by standardized curriculum utilizing drill and practice oriented instruction.³⁸ Drill and practice oriented instruction tends to utilize less highly trained staff and is thus less expensive. It also may offer the chance to improve student test performance quickly over the short term. Characteristics that translate into cost savings and the chance for posting quick results that may attract future contracts.

From a business stand point, the for-profit industry's apparent strategy is commendable particularly in light of the charter and privatization friendly provisions of No Child Left Behind. It is, however, suspect as an educationally valid approach to public

education and appears to move charter school reform away from its original promise of small, community-based schools run by teachers and community members and offering diverse curricula.

Developments in the For-Profit Industry

In 2004-2005, two developments merit particular attention.

In February of 2004 six of the country's largest education management organizations formed The National Council of Education Providers. The companies involved are Charter Schools USA, Edison Schools, Imagine Schools (formerly Chancellor Beacon Academies), Mosaica Education, National Heritage Academies, and White Hat Management. The council is funded by each of its six members at \$5,000 a month, for a total annual budget of \$360,000.³⁹ The professed goals of the council are to seek more public money for charter schools as well as more charter friendly legislation, and to counter negative criticism of for-profit management of charters.⁴⁰ Jeanne Allen, charter school advocate and founder and president of the non-profit Center for Education Reform (CER), also leads The Allen Company, a lobbying firm that represents the interests of the National Council of Education Providers. Allen plans to maintain her post with CER while lobbying for the council.⁴¹ Allen's dual role of charter school advocate and EMO lobbyist symbolizes the degree to which the charter school movement has been taken over by large, for-profit firms.

In August of 2004, the Department of Education announced that the Schools and Staffing Survey, which provides information on charter schools (such as number of schools, teacher and principal qualifications, the number of low-income students attending those schools, and teacher to student ratios), will no longer provide such information on all charters across the nation. Rather, the survey will only cover a random sample of approximately 300 charter schools.⁴² This change will make it difficult to gather information about the varied styles of charter schools and make comparisons between performance of charter and district schools.

Using the Profiles

The companies profiled represent those that Commercialism in Research Unit and Education Policy Research Unit researchers could identify as for-profit management companies, and are likely to represent only the larger or higher-profile companies in operation. A substantial number of EMOs that operate a small number of schools may not be included in the *Profiles*. At this point there is no way to track such small providers systematically. Appendix A contains a list of companies profiled in previous reports but are not included in this year's edition.

Finally, it is important to note that while this report labels education management companies as “profitable” and “not profitable,” in the case of privately held companies, the designation is based on the companies’ self-reports. Unlike publicly traded

companies that are required by law to make earnings statements public, privately held companies have no such requirement. Fifty-seven of the 59 companies profiled are privately held.

Notes & References

- ¹ Prior to 2002, the *Profiles* report was compiled by CERU and EPRU's predecessor units, the Center for the Analysis of Commercialism in Education (CACE) and the Center for Education Research, Analysis, and Innovation (CERAI) located at the University of Wisconsin-Milwaukee.

- ⁵ On Edison's website, the company profile states that Edison manages 157 district and charter schools (<http://www.edisonschools.com/overview/ov0.html>). Its school list page (<http://www.edisonschools.com/schools/schools.asp>), however, only lists 111 schools. That list includes schools under Edison's "Alliance Partnership," which, according to its website, is a consulting initiative where "the district maintains management and operational control of schools" (<http://www.edisonschools.com/overview/alliance.html>). Therefore, the 13 schools under the Alliance Partnerships were removed from the *Profiles*, giving Edison 98 schools under management. The information in the *Profiles* was confirmed by Adam Tucker, vice president of communications for Edison Schools, on December 13, 2004.
- ⁶ Edison officials did not reply to three separate requests from CERU/EPRU researchers to verify the number of schools under management and the enrollment in each school for the 2003-2004 *Profiles*. The information was gathered from Edison's website and other sources. In Edison's "Seventh Annual Report of School Performance 2003-2004," the company claimed it managed 124 schools. See:

**For-Profit Education Management Organization Profiles
2004-2005 Directory**

Totals in This Report	Total Companies	Total Number of Public Schools Under Management	Number of Public Schools Under Management That Are Charter Schools	Total Number of Students in Managed Schools.	Number of States in which Companies Manage Public Schools
	59	535	458*	239,766**	24 states and the District of Columbia

*459 charter schools are only those which have been positively identified as charter schools. It is therefore possible (and likely) that other schools EPSL was unable to identify are also charter schools, but are not included in that number.

**This number has been projected in order to compensate for the 11 schools which did not report student enrollment numbers. 236,258 students attend the 524 schools in which enrollment data could be obtained.

Summary of For-Profit Education Management Companies managing virtual schools, listed in alphabetical order.*

Company Name	Company Location	Total Number of Public Schools Under Management	Number of Public Schools Under Management That Are Virtual Schools	Total Number of Students in Managed Virtual Schools.	States in Which Company Is Managing Virtual Schools
Connections Academy	Baltimore, MD	10	10	1,081**	AZ, CA, CO, FL, OH, PA, WI
Designs for Learning, Inc.	St. Paul, MN	10	1	50	MN
K12, Inc.	McLean, VA	15	15	14,460	AZ, CA, CO, DC, FL, ID, OH, PA, WI
Pinnacle Education, Inc.	Tempe, AZ	9	1	212	AZ
Sequoia Charter Schools	Mesa, AZ	11	1	160	AZ
White Hat Management	Akron, OH	38	2	3,508	OH, PA

*Individual information for each virtual school can be found in the managing company's profile. Virtual schools are indicated by the words "virtual school" in parenthesis in the field containing the school name.

**This number represents the students enrolled in 4 of Connections Academy's 10 schools.

	Total Companies	Number of Schools managing	Number of Virtual Schools	Students in Virtual Schools	States in which company is managing virtual schools
Totals: Companies managing virtual schools	6	93	30	19,471***	AZ, CA, CO, DC, FL, ID, MN, OH, PA, WI

***This number represents the students enrolled in 24 of 30 virtual schools.

Charter School?	No
Description	
CapoCA was authorized by the Capistrano Unified School District as a charter school serving Orange County and contiguous counties. Serves grades K-8.	

Southern California Connections Academy	
Parent Company	Connections Academy
Telephone	Voice - 949-489-1219 Fax - 949-306-8498
WWW Address	www.connectionsacademy.com

NOTES:

- Information gathered from the Connections Academy website at <http://www.connectionsacademy.com/state/about.asp?sid=ca> on 6 December 2004.

Year Founded	2004
Number of Students	Unknown
Charter School?	No
Description	
SoCCA was approved as a charter school of the San Diego Unified School District and will be governed by an independent board of directors. Serves grades K-8.	

APPENDIX B - For-Profit Virtual Schools Listed by State

The following is a list of virtual schools which are managed by for-profit education management organizations.

Colorado Virtual Schools

Colorado Virtual Academy	
Parent Company	K12 Education
Telephone	Voice - 303-255-4650 Fax - 303-255-7044
WWW Address	www.covcs.org

NOTES:

- Information gathered from the Colorado Virtual Academy website at www.covcs.org on 6 December 2004.

Year Founded	2001
Number of Students	1,900
Charter School?	Yes
Description	
Colorado Virtual Academy is a charter school in a partnership with the Academy of Charter Schools and offers instruction in grades K-8. Any student in Colorado is eligible to enroll.	

Denver Connections Academy	
Parent Company	Connections Academy
Telephone	Unknown
WWW Address	www.connectionsacademy.com

NOTES:

- Information gathered from the Connections Academy website at <http://www.connectionsacademy.com/state/home.asp?sid=co> on 6 December 2004.

Year Founded	2002
Number of Students	300
Charter School?	No
Description	
Connections Academy operates full-time public virtual schools in Colorado under contract with sponsoring school districts such as the Denver Public Schools and Pueblo School District 60. Serves students in grades K-8.	

APPENDIX B - For-Profit Virtual Schools Listed by State

The following is a list of virtual schools which are managed by for-profit education management organizations.

Colorado Virtual Schools (continued)

WWW Address	www.ohdela.com

NOTES:

- Information gathered from the OHDELA website at www.ohdela.com on 12 December 2002

Year Founded	2002
Number of Students	3,228
Charter School?	Yes
Description	
OHDELA Academy is a charter school which offers instruction in grades K-12. Any student in Ohio is eligible to enroll.	

APPENDIX B - For-Profit Virtual Schools Listed by State

The following is a list of virtual schools which are managed by for-profit education management organizations.

Ohio Virtual Schools (continued)

Ohio Connections Academy	
Parent Company	Connections Academy
Telephone	Voice - 614-840-9401
WWW Address	www.connectionsacademy.com

NOTES:

- Information gathered from the Ohio Connections Academy website at <http://www.connectionsacademy.com/state/home.asp?sid=oh> on 20 December 2002.

Year Founded	2003
Number of Students	Unknown
Charter School?	Yes
Description	
Connections Academy operates one school in Ohio under contract to the Ohio Connections Academy (OCA). OCA is a community school sponsored by the Ohio Council of Community Schools. The school is able to accept students from anywhere in the state.	

Ohio Virtual Academy	
Parent Company	K12 Education
Telephone	Voice- 419-482-0948 Fax- 419-482-0954
WWW Address	www.ohva.org

NOTES:

- Information gathered from the Ohio Virtual Academy website at www.ohva.org on 6 December 2004.

Year Founded	2002
Number of Students	2,600
Charter School?	Yes
Description	
Currently serving students in kindergarten through eighth grade, OHVA is committed to putting a top-quality education within reach of thousands of students in Ohio.	

APPENDIX B - For-Profit Virtual Schools Listed by State

The following is a list of virtual schools which are managed by for-profit education management organizations.

Pennsylvania Virtual Schools

Commonwealth Connections Academy	
Parent Company	Connections Academy
Telephone	Voice - 717-236-9840
WWW Address	www.connectionsacademy.com

NOTES:

- Information gathered from the Connections Academy website at <http://www.connectionsacademy.com/state/home.asp?sid=pa> on 6 December 2004.

Year Founded	2003
Number of Students	Unknown
Charter School?	No
Description	
Commonwealth Connections Academy (CCA) is the first virtual school to be approved under Pennsylvania's stringent new cyber-charter law. CCA serves students in grades K-8 across Pennsylvania.	

PDELA	
Parent Company	White Hat Management
Telephone	Voice - 877-264-9793
WWW Address	www.pdela.com

NOTES:

- Information gathered from the PDELA website at www.pdela.com on 6 December 2004.

Year Founded	2004
Number of Students	280
Charter School?	Yes
Description	
PDELA is a home-based public charter school that combines direct parent involvement, certified teachers, and state-of-the-art computer technology and delivery. PDELA is designed to furnish an individualized distance learning program for children in grades K-12.	

APPENDIX B - For-Profit Virtual Schools Listed by State

The following is a list of virtual schools which are managed by for-profit education management organizations.

Pennsylvania Virtual Schools

Pennsylvania Virtual Charter School	
Parent Company	K12 Education
Telephone	Voice- 610-275-8500 Fax- 610-275-1719
WWW Address	www.pavcs.org

NOTES:

- Information gathered from the Pennsylvania Virtual Charter School website at www.pavcs.org on 6 December 2004.

Year Founded	2001
Number of Students	4,000
Charter School?	Yes
Description	
Pennsylvania Virtual Charter School offers instruction in grades K-8. Any student in Pennsylvania is eligible to enroll.	

Wisconsin Virtual Schools

Wisconsin Virtual Academy	
Parent Company	K12 Education
Telephone	Voice - 262-692-3988 Fax - 262-692-3952
WWW Address	www.wivcs.org

NOTES:

- Information gathered from the Wisconsin Virtual Academy website at www.wivcs.org on 6 December 2004.

Year Founded	2003
Number of Students	630
Charter School?	Yes
Description	
Wisconsin Virtual Academy is a public virtual school program that blends innovative new instructional technology with a traditional curriculum for students in grades K-8 all across Wisconsin.	

APPENDIX B - For-Profit Virtual Schools Listed by State

The following is a list of virtual schools which are managed by for-profit education management organizations.

Wisconsin Virtual Schools (continued)

Wisconsin Connections Academy	
Parent Company	Connections Academy
Telephone	Voice - 920-993-7076 Fax - 920-832-6284
WWW Address	www.connectionsacademy.com

NOTES:

- Information gathered from the Connections Academy website at <http://www.connectionsacademy.com/state/home.asp?sid=wj> on 6 December 2004.

Year Founded	2003
Number of Students	450
Charter School?	Yes
Description	
WCA is a charter school authorized by the Appleton area school district (AASD). The school is able to accept students K-8 from anywhere in the state.	

APPENDIX C - Methods

Methods Related to Common Core of Data Calculations

All schools are divided into four categories according to the National Center for Education Statistics report ‘Overview of Public Elementary and Secondary Schools and Districts: School Year 2001-2002.’ The categories are established based on the instructional levels, lowest and highest grades, served per individual schools. The categories and instructional levels are as follows:

- Primary - schools with a low grade of prekindergarten through grade 3 and a high grade of up to 8 (For the purposes of this study, pre-kindergarten enrollment counts are excluded from all analyses).
- Middle – schools with a low grade of 4 to 7 and a high grade ranging from 4 to 9.
- High – schools with a low grade of 7 to 12 and extends to grade 12.
- Other - all other grade configurations, including ungraded schools.

(Source: <http://nces.ed.gov/pubs2003/2003411.pdf>)

The national district and charter school enrollment averages are derived from schools in the 2002-2003 Common Core of Data, excluding non-operational schools, schools located in rural areas and small towns and schools with a zero student count in grades K-

12. The average enrollment per grade is calculated by school category. This method yields several national averages to account for differential enrollment counts by school category. For example, this method produces six national average enrollment counts for fourth grade, one separate average enrollment count per school category. The average enrollment is calculated for primary schools which serve students in fourth grade, for middle schools serving fourth grade students, and schools categorized as other that serve students in fourth grade. The average enrollment counts are calculated separately for charter and non-charter schools.

The individual grade-level national average enrollments are combined to match every unique instructional level in for-profit schools. The enrollment for each for-profit school is compared to the sum of the national averages for each grade level combined by the appropriate grade levels served. For example, the enrollment for a for-profit charter school serving elementary grades 1-6 is compared to the sum of the average charter school enrollment for each separate grade level (1-6). See Appendix D for the national average grade-level enrollments by school category and charter school status.

Methods for Compiling School Profiles

Compiled each year since 1998-1999, *Profiles of For-Profit Education Management Companies* documents the number of for-profit firms involved in managing publicly funded schools, identifies the schools they manage, and records the number of students those schools enroll. The *Profiles* report is compiled from a combination of sources. Internet searches are conducted on the name of

each known EMO to identify schools with which the EMOs have contractual relationships. The resulting lists of schools are compared with previous years' lists. When a school previously listed as having a relationship with a particular EMO appears to have dropped off the list, researchers use Internet search engines and news media databases, primarily Lexis-Nexis, to attempt to ascertain the reasons for the change. The information gathered is sent to each EMO to verify its accuracy. Company representatives are encouraged to send additions and corrections to the Education Policy Studies Laboratory for inclusions in the next edition of the *For-Profit Profiles Report*.

The companies profiled represent those that CERU/EPRU researchers could positively identify as for-profit management companies, and are likely to represent only the larger or high-profile companies that exist. It is important to note that while this report labels education management companies as "profitable" and "not profitable," in the case of privately held companies, the designation is based on the companies' self-reports. Unlike publicly traded companies that are required by law to make earnings statements public, privately held companies have no such requirement.

APPENDIX D—National Average Enrollments by Grade Levels

Table 1: Average Enrollments for Average U.S. Charter and District Primary Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
K-2	137.35	246.20
K-3	179.48	330.30
K-4	222.06	414.39
K-5	262.59	497.89
K-6	297.71	572.56
K-7	330.91	641.29
K-8	360.79	708.28
1-6	250.15	492.48
3-7	193.56	395.09
4-5	83.11	167.60

Note: Averages were compiled using the 2002-2003 Common Core of Data.

APPENDIX D—National Average Enrollments by Grade Levels

Table 2: Average Enrollments for Average U.S. Charter and District Middle Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
4-8	181.30	377.98
5-8	310.56	961.14
6-8	250.14	780.62
7-9	196.85	607.89
9	31.94	84.26

Note: Averages were compiled using the 2002-2003 Common Core of Data.

Table 3: Average Enrollments for Average U.S. Charter and District High Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
7-10	243.12	1,154.62
7-11	298.81	1,420.70
7-12	349.37	1,665.66
8-12	298.10	1,391.17
9-10	141.41	638.00
9-12	247.65	1,149.05
10-11	122.94	564.82

Note: Averages were compiled using the 2002-2003 Common Core of Data.

APPENDIX D—National Average Enrollments by Grade Levels

Table 4: Average Enrollments for Average U.S. Charter and District Other* Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
K-1, 4-5	176.61	330.94
K-9	409.69	275.68
K-10	456.68	318.76
K-11	498.46	356.43
K-12	542.32	397.59
4-12	385.50	314.02
6-10	226.19	194.76
6-11	267.96	232.43
6-12	311.83	273.59

Note: Averages were compiled using the 2002-2003 Common Core of Data.

*The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix C.
